

UNITY IS PEACE,
PEACE IS UNITY

For millennia, in the East and in the West, humans have understood that Peace is the same as Human Unity and that, as Mozi says, partiality is the cause of all evils or as Rousseau puts it: sovereignty is the cause of war.

LET'S UNITE

- In the past it was impossible to unite because the World and the people in it was unknown
- Today it is possible,
- but the difficulty is still that states cannot promote unity because they are ineludibly partial.
- So, it is up to us, the people, without discrimination of nationality (or any discrimination) to take this initiative.

OUR MISSION

- To implement human union we need to tell and to show all the people that human unity has become possible and it will only benefit all and each one of us and it is of interest of each one to support it and contribute to spreading human unity proposal.
- Therefore, we are asking you, oh, dear, that you share this quest for human unity up to the point we make it a public question requiring an answer from everyone, which will be enough for its implementation.

OUR VISION

- Human unity consists in dismantling borders and eliminating armies because their only cause of being is other's existence (or could then say; they are by themselves) and, besides arms, there is not another problem among humans.
- States peaceful coexistence is illusory because any arm is integrated – hierarchically- in an armed unit or state, or else, it is illegal or enemy and, therefore, shall be destroyed.
- Out of arms meant to killing and harming, everything else just serves us and, therefore, we can understand so much what is to improve something as to clearly agree about how and whom shall be served by that resource, object or service and what is common good.
- There is no other conflict among us than those arms, whose constant effect, besides its punctual activity of killing and destroying, is to deprive (as also to limit, to restrain, to prevent, to take away freedom...) and, therefore, to dismantle them is to eliminate deprivation, to build up human community.

OUR VISION

- United there will not even be there an state or a single army because it does not make sense without opponents, There will not even be there a single weapon because using common sense, how will we consent (producing) 'homicidal tools'?
- United, living together, we will distinguish evil – something meant to harm- and good -cooperation and service- as clear as we now distinguish white from black or sweet from bitter. (If we are united politics are not longer needed since politics are there to address the conflicts, but arms is the only conflict source and without them, there is not conflict among humans)
- We can live together just if we propose it, make it public, because time is ripe for it now. This human union will has not been at all absent in history, but this will could not be practiced/implemented in the past. How would you cooperate with those you do not know? However, even if you do not know them, you needed to defend yourself, to arm yourself, and they would also be there armed and hierarchically organized too. Now, however, we can all cooperate at once, this is; we can join and live together because to unify is a universal and simultaneous cooperation action.

OUR VALUES

- The procedure, real aim and main value is Transparency, this is; we are responsible in front everybody's judgement in such a way that we can prevent that by any lack of attention somebody's interest be underestimated.
- We only aim at the Human Unity question to be published and openly considered because if it is discussed publicly, openly we have already achieved it since it can not be publicly contested.

IMPLEMENTATION

- Paradoxically, to unite or to disarm is not dangerous or risky because it needs to be done with agreement and cooperation of all in the world, otherwise, which would be unilateral disarmament, we would not attain our aim, because unilateral disarmament does not actually mean disarmament, but incorporation in another army, under another hierarchy. So, we can only make it all together, simultaneously, sincerely...

WORLD GOVERNMENT

Currently, governments consider political proposals for their states according with their strategic, confrontational, security priorities, and consequently they can only be partially open to the public for discussion.

However, human issues are not political, they are not as politics based on the conflict, but addressed by the best experts in every field which will put forwards their suggestions about how to work together on them.

Experts generate an open and always available document so that everyone can show his/her agreement, disagreement or better their proposal. The world is run with transparency and all's understanding, agreement and cooperation.

HUMAN COMMUNITY

- Human unity is also human community as a result of the armed units dissolution but also as a result of the evolution of companies (becoming common resources) according to their Human Responsibility.
- Currently the Corporate Social Responsibility, CRS, refers to good or bad practices in their operations independently of their entrepreneurship aim (it is the same make cars than make bombs, or being a teacher or a trained killer –soldier, as long as you get paid)
- But Corporate Human Responsibility, CHR, requires, besides transparency and accountability, responsibility regarding entrepreneurship aim or service. Companies servicing humanity more and better will be more estimated independently from their ownership, sovereignty (the real private property), so that ownership does not play any role, becomes insignificant, redundant. Also companies are most of them multinationals and have to respond for Humanity.

START POINT

- We, the people, as users and consumers, are really free already now to choose or select the companies we want to deal with and we already can require from them Human Responsibility; support to human unity and, in the end, just transparency
- But companies will not act if they are not moved by us, by our purchasing decisions, therefore we have to create a net of people who compromises in supporting companies also supporting human unity.
- This is; people agreeing about only purchasing, deal, etc. with companies supporting human unity as long as it is not prejudicial for them.
- Would you agree with this?
